Subject: NM23-PA03-Roddington Parish - TWC response to proposals

To: CLERK Rodington Parish Council <rodingtonpc@gmail.com>

Currently Telford and Wrekin Council do not have the funding available to progress any of the proposals shown below and have no design time available to consider the proposals further, as we are completely stacked out with design work this financial year. Therefore, everything shown below would have to wait until the 2025/26 financial year and this could possibly move to 2026/27 financial year dependent on how other design work develops during this time.

Also, as Telford and Wrekin Council have no funding available, all costs for design and implementation would have to be provided by the Parish.

Please find below TWC comments to your proposals.

Roddington Parish Council proposals.	T&W Comments
Relocate speed limit further from village and install new welcome to signage.	It will not be possible to extend the speed limit as we already have compliance issues and by relocating the limit a short distance would not achieve a suitable reduction in vehicle speeds.
Insert cobble setts in over run area and install hatching.	These works could possibly be considered for progression in the 2025/26 financial year and would need to be funded solely by the Parish Council.
Remove centre white line and replace with cobble sett strip	These works could possibly be considered for progression in the 2025/26 financial year and would need to be funded solely by the Parish Council.
Relocate signage away from bridge.	These works could possibly be considered for progression in the 2025/26 financial year and would need to be funded solely by the Parish Council.
Insert cobble setts as rumble strip.	These works could possibly be considered for progression in the 2025/26 financial year and would need to be funded solely by the Parish Council.
Amend 40mph to 30mph before Longdon Upon Tern and install hatched areas.	It will not be possible to amend the speed limit as we would have to introduce another 40mph limit in advance of this and as we already have compliance issues, this small change would not achieve a suitable reduction in vehicle speeds.
Relocate speed limit further from village and install new welcome to signage.	It will not be possible to extend the speed limit as we already have compliance issues and by relocating the limit a short distance would not achieve a suitable reduction in vehicle speeds.
